

INT105 Basic SQL – Database Lab #1

1. Create 3 tables: LECTURERS, COURSES, STUDENTS with the following columns:

LECTURERS: LECTURER_ID (PK), LECTURER_NAME, SPECIALIZATION, TELEPHONE

COURSES: COURSE_CODE (PK), COURSE_TITLE, CREDITS

STUDENTS: STUDENT_ID (PK), STUDENT_NAME, GPAX, DEPARTMENT

Use appropriate data types for each column.

2. Insert at least 4 rows in each table using different forms of insertion statement. Insert null values in some columns of each table.
3. List data from each table.
